

Summer 2026 Round-up

We're Having a Heatwave!

Our Field Sales team shown here donning their exclusive Firth Doors & Hardware by ABLP Hestia Hawaiian shirts at our recent staff social. It is now their mission to see how far these shirts can travel this summer as each will be taking them away on holiday with them!

So when you're lounging on those sunbeds over the next few weeks with your cocktail look out as you may just spot one!!

Cyber Essentials Plus

We're proud to share that ABLP Hestia Ltd, trading as Firth Doors & Hardware, has achieved Cyber Essentials Plus certification.

Following our Cyber Essentials certification in April 2026, this independent, government-backed verification demonstrates that our cyber security controls have been rigorously tested and are working effectively in practice. For our customers, particularly those in the construction, housing and public sectors, it provides additional assurance that we're committed to protecting sensitive information, reducing cyber risk, and meeting the high standards expected throughout the supply chain.

A huge thank you to Calder IT Ltd for their expert guidance and support throughout the process, and a special shout-out to our IT Director, Lee Beardsmore, whose hard work and commitment made this achievement possible.

We're continually investing in our people, systems and processes to ensure we remain a trusted and secure partner for our customers.

Our partnership with Secured by Design continues into its 18th year!

The renewal of our membership for an 18th year highlights our continued dedication to supplying products that support safer and more secure homes, while maintaining the high standards expected by housebuilders and specifiers across the UK.

Amanda Haley, Managing Director, said: "We are very proud to carry the Secured by Design accreditation on our products, as we believe in doing the right thing for our customers and the industry as a whole. We particularly appreciate the work SBD do in the community in making our streets safer and we are very pleased to be contributing to this in our way."

Alfie Hosker, Secured by Design, commented: "We are delighted to see Firth Doors & Hardware continue their long-standing partnership with Secured by Design. Their ongoing commitment to high quality, security-focused products helps support the delivery of safer homes across the UK."

Long Service Achievement

Last month we celebrated a remarkable milestone for our longest-serving current employee, Neil Debenham, who marked 38 years of service with us.

Neil joined the business in 1988 and has been a familiar face driving our delivery vehicles ever since, demonstrating dedication, professionalism, and commitment every single day. Well done Neil and a huge thank you!

"This isn't just an ordinary Firth doorset...

This is a professionally installed Firth doorset."

At Firth Doors, we know that a quality doorset deserves a quality installation. That's why we offer a professional fitting service through our network of expert fitting partners, helping ensure every doorset is installed to the highest standard.

Ask your area representative or contact us at sales@firthdoors.co.uk for details.

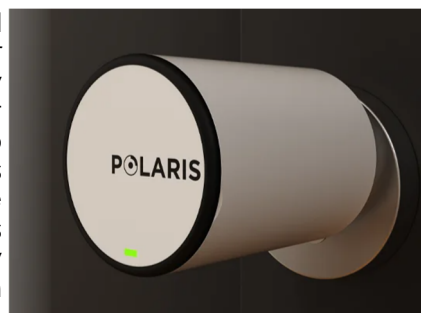

Welcome on board!

This summer we added a new face join the Field Sales team - Stephen McCafferty - who is our new Sales Support Representative for Scotland and North East England. Having completed his induction and product training he sets out visiting customers and sites over the next few weeks so if you're on his patch we're sure you'll be meeting him soon.

Coming Soon:

We're really excited and can't wait to offer our customers the very latest in Smart Technology built into our doorsets. This solution gives the same tried and trusted levels of security and quality but with the addition of intelligent locking, meaningful door status monitoring and effortless operation. Working with our supplier partners, Winkhaus, Smart Spec Doorset by ABLP Hestia comprises the Polaris Smart Lock designed to be used by either smartphone, remote fob or by a traditional key, to make everyday life simpler, smarter and more secure.

The smarter way to secure your home

Making a Difference Together.....

Our production team recently designed, built and installed wildlife feeding and habitat stations in our grounds. These support local biodiversity and habitat creation while also promoting responsible resource use and waste reduction in line with the UNs Sustainability Development Goals:

- SDG 15 Life on Land,
- SDG 11 Sustainable Cities and Communities,
- SDG 12 Responsible Consumption and Production.

Well done team although it seems our feathered friends prefer mealworm to seeds! Who knew?
